

Perfect partners for eProcurement.

Unimarket provides the only complete end-to-end integration with Ellucian Colleague, empowering your institution with a best-in-class, cost-effective eProcurement solution.

Like many forward-thinking colleges and universities, you know that a purpose-built eProcurement solution is one of the most effective ways to deliver process efficiencies and cost savings. But which is the right solution for your institution?

It's crucial that your chosen solution integrates tightly with your ERP and provides outstanding value for money. It's also vital to find an experienced procurement partner that truly understands your needs and is committed to delivering the best outcome for you.

For these reasons and more, many institutions using the Ellucian Colleague ERP turn to Unimarket.

Unimarket has been an Ellucian partner for over a decade. More than 75% of our clients use an Ellucian ERP, and over half of all higher education institutions that have implemented the Unimarket solution over the past two years are running Ellucian Colleague.

Many colleges and universities that use Ellucian Colleague choose Unimarket because of its unsurpassed compatibility: only the Unimarket solution integrates with Ellucian Colleague for a single end-to-end procurement solution that spans procurement, invoicing, and payments.

The result is an instantly familiar and intuitive shopping experience your people will love and the visibility and control you need to boost efficiency and realize cost savings. Plus, a close integration means Ellucian Colleague remains your system of record at all times.

How does Unimarket get *procurement done right* for you?

Ease

Give your people a familiar marketplace shopping experience.

Automate everything, from requisition generation to approvals.

Save time and resources with a cloud-based solution that updates automatically and needs no installation.

Visibility & control

Know how much your users are spending, what they're buying, and from which suppliers.

Ensure purchases are authorized before spend is committed with upfront requisition approval.

Forecast with reliable data on historical and committed spend.

Savings

Create buying power by directing spend to preferred suppliers.

Save time and money by cutting out paperwork and automating processes.

Onboard suppliers without the need for time-consuming, point-to-point integrations.

Integration made easy

Software integrations can be highly complex and time-consuming projects. As a result, college and university IT departments with limited resources are reluctant to consider the introduction of new technology.

That's why we developed Colleague EasyConnect — a simple and cost-effective way to integrate the Unimarket eProcurement solution with your Ellucian Colleague ERP.

Colleague EasyConnect allows for a no-fuss integration that ensures a flexible, reliable, and seamless relationship with your ERP, enabling procurement, finance, and accounts payable teams to work more efficiently and effectively across the entire procurement process.

Delivered by our expert implementation team, there's no need for a detailed system assessment and minimal burden on your IT resources. We also support enterprise-level authentication through single sign-on, and we can easily integrate with other solutions within your wider IT ecosystem for total harmony.

Once integrated, the Unimarket solution can be configured to your organization's specific needs, from tailored approval workflows to the custom management of invoice exceptions.

Plus, because Unimarket is a cloud-based solution, all product updates and patches happen automatically and without disruption.

“If I had to define Unimarket, it would be ‘collaborative.’ They’ve always been there for us and we’ve benefited immensely from it.”

Nick Rose, Coordinator of Purchasing Systems at Lehigh University.

Designed for higher education

Your organization has different needs, circumstances, and challenges than others. That's why we offer a flexible procurement solution that provides all the functionality you need without unnecessary complexity and cost.

Marketplace

Our integrated catalog-driven marketplace lets you quickly find and buy the things you need from your preferred suppliers at your negotiated prices.

A well-established network of suppliers means many of the suppliers you work with may be ready to connect already. For those that aren't, we'll work to onboard them on your behalf.

eProcurement

Building on Marketplace, our eProcurement solution adds the capability to manage your purchase orders, approvals, and requisition process.

Your users will love shopping made easy, while you will be able to realize the benefits of centralized buying, control, and visibility.

eProcurement+

Unimarket's most comprehensive solution manages your entire procurement process, from purchasing to managing supplier invoices.

Automating accounts payable will help you make substantial savings on invoice processing costs and free up staff to focus on more strategic objectives.

Add-ons

Our Contracts Add-on makes it easy to manage your supplier contracts by bringing them all into a single, searchable contract repository.

Looking to reduce your payment processing costs? Our Payments Add-on lets you integrate payments into the procurement and invoice management process.
