

Perfect partners for eProcurement.

Built for higher education, the Unimarket eProcurement solution tightly integrates with Ellucian Banner to create the optimal procurement process.

Optimizing processes and generating cost savings are central to procurement success. But delivering on those goals can be impossible without a highly capable procurement solution that's fully aligned with how your institution and its systems work.

Purpose-built eProcurement tools have emerged as the gold standard for managing and transforming procurement. But your chosen solution must be a great fit for the financial heart of your institution — its ERP.

That's why so many colleges and universities using Ellucian Banner look to Unimarket's best-in-class eProcurement solution when they need to power up their procurement process.

Unimarket has been an Ellucian partner for over a decade and more than 75% of our clients use an Ellucian ERP. We've built the experience our higher education clients trust and the solution functionality their institutions need.

From an intuitive marketplace shopping experience to automated approvals and invoicing, Unimarket complements Ellucian Banner perfectly. The combination provides a highly optimized procurement process that gives your college or university total control and visibility while ensuring Ellucian Banner remains the system of record.

Better still, Unimarket provides unparalleled value for money by integrating tightly with Ellucian Banner to form a single end-to-end procurement solution at the lowest possible cost.

How does Unimarket get *procurement done right* for you?

Ease

Give your people a familiar marketplace shopping experience.

Automate everything, from requisition generation to approvals.

Save time and resources with a cloud-based solution that updates automatically and needs no installation.

Visibility & control

Know how much your users are spending, what they're buying, and from which suppliers.

Ensure purchases are authorized before spend is committed with upfront requisition approval.

Forecast with reliable data on historical and committed spend.

Savings

Create buying power by directing spend to preferred suppliers.

Save time and money by cutting out paperwork and automating processes.

Onboard suppliers without the need for time-consuming, point-to-point integrations.

Integration made easy

Software integrations can be highly complex and time-consuming projects. As a result, college and university IT departments with limited resources are reluctant to consider the introduction of new technology.

That's why we developed Banner EasyConnect — a simple and cost-effective way to integrate the Unimarket eProcurement solution with your Ellucian Banner ERP.

Banner EasyConnect allows for a no-fuss integration that ensures a flexible, reliable, and seamless relationship with your ERP, enabling procurement, finance, and accounts payable teams to work more efficiently and effectively across the entire procurement process.

Delivered by our expert implementation team, there's no need for a detailed system assessment and minimal burden on your IT resources. We also support enterprise-level authentication through single sign-on and we can easily integrate with other solutions within your wider IT ecosystem for total harmony.

Once integrated, the Unimarket solution can be configured to your organization's specific needs, from tailored approval workflows to the custom management of invoice exceptions.

Plus, because Unimarket is a cloud-based solution, all product updates and patches happen automatically and without disruption.

“With Unimarket everything is structured in a way that works for our larger and mid-size schools, as well as our smaller school communities.”

Wanda Hernandez, Executive Director of Operations and Procurement at the Touro College & University System — an Ellucian Banner user.

Designed for higher education

Your organization has different needs, circumstances, and challenges than others. That's why we offer a flexible procurement solution that provides all the functionality you need without unnecessary complexity and cost.

Marketplace

Our integrated catalog-driven marketplace lets you quickly find and buy the things you need from your preferred suppliers at your negotiated prices.

A well-established network of suppliers means many of the suppliers you work with may be ready to connect already. For those that aren't, we'll work to onboard them on your behalf.

eProcurement

Building on Marketplace, our eProcurement solution adds the capability to manage your purchase orders, approvals, and requisition process.

Your users will love shopping made easy, while you will be able to realize the benefits of centralized buying, control, and visibility.

eProcurement+

Unimarket's most comprehensive solution manages your entire procurement process, from purchasing to managing supplier invoices.

Automating accounts payable will help you make substantial savings on invoice processing costs and free up staff to focus on more strategic objectives.

Add-ons

Our Contracts Add-on makes it easy to manage your supplier contracts by bringing them all into a single, searchable contract repository.

Looking to reduce your payment processing costs? Our Payments Add-on lets you integrate payments into the procurement and invoice management process.
